## About

Frontend Developer with 3 years of experience building scalable, high-performance, and maintainable applications using React and React Native. Experienced in HTML, CSS, JavaScript, TypeScript, Redux, SCSS, and other modern technologies. Professional English level C1.

## Experience

### Frontend Web/Mobile Developer

Piyion | June 2022 - Present

- Developed scalable web applications using React, TypeScript, and Firebase, improving maintainability and performance.
- Built and deployed a cross-platform mobile application with React Native, enhancing accessibility and engagement for a growing user base.
- Managed manual deployments of web applications using Firebase Hosting, leveraging preview channels and production releases to ensure smooth rollouts.
- Optimized API consumption and UI rendering, leading to faster load times and a smoother user experience.
- Actively collaborated with cross-functional teams to refine product features and implement best practices in frontend development.

### Frontend Web Developer

Ninus Design & Technology | March 2022 - June 2022

- Developed and maintained responsive web interfaces using React and SCSS, ensuring pixel-perfect implementation of UI/UX designs.
- Integrated REST APIs to dynamically fetch and display data, improving application interactivity.
- Collaborated with designers and backend developers to ensure seamless integration between UI components and APIs.

## Education

### Computer Science and Engineering

Pontificia Universidad Javeriana - Cali, Colombia | 2018 - 2022

### Honors and awards

- Academic Excellence Scholarship | July 2021
- Honorable Mention to Degree Work | April 2023

## Skills

### Languages

HTML, CSS, SCSS, JavaScript, TypeScript

### Libraries & Frameworks
